## POPULATION AND DWELLING UNITS

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

## LOS ANGELES COUNTY POPULATION

**January 1, 1969 Estimate .....7,154,845**

The population of Los Angeles County rose an estimated 18,025 persons during the fourth quarter to reach a January 1, 1969 total of 7,154,845. This new total represents a 1968 population increase of 67,168 and a gain of 1,112,145 persons or 18.4% since the 1960 Census.

During 1968, the population of the County's seventy-seven cities increased 129,652 while the number of those living within the unincorporated area declined 62,484. The unincorporated areas loss was the result of the incorporation of the city of Carson and several inhabited annexations.

The population ranking of the County's ten largest cities has not changed. Their population on January first were as follows:

1. Los Angeles, 2,855,253; 2. Long Beach, 383,858; 3. Glendale, 137,818; 4. Torrance, 135,335; 5. Pasadena, 125,831; 6. Downey, 97,636; 7. Burbank, 97,262; 8. Norwalk, 96,389; 9. Santa Monica, 91,730 and 10. Inglewood, 89,875.

## MODEST RECOVERY IN NET DWELLING UNIT ADDITIONS

The modest recovery in net dwelling unit additions which began in the third quarter of 1967 continued through 1968. Net additions to the housing inventory totaled 18,438 dwelling units. This was a 59% increase or 6,844 more units than were added in 1967.

The major factor in the net increase of the housing inventory during 1968 was multiple unit additions. This continues the trend to multiples which first became evident in

### LOS ANGELES COUNTY DWELLING UNIT TYPES**

| | | | | |
|---|---|---|---|---|
| Jan. 1, 1969 | 1,522,308 | 210,964 | 823,230 | 2,556,502 |
| Apr. 1, 1960 | 1,401,581 | 195,010 | 513,017 | 2,109,608 |
| Increase Since 1960 | 120,727 | 15,954 | 310,213 | 446,894 |
| Percent of Total Increase | 27.0 | 3.6 | 69.4 | 100.0 |

*These figures are compiled from a monthly survey of residential new construction, move-ins, removals, demolitions and alterations reported by each of the permit issuing agencies in Los Angeles County. Unit changes are entered in the estimated housing inventory after either actual or assumed completion.

**These totals include additional adjustments not reported in the regular building permit review.

THE REGIONAL PLANNING COMMISSION OF LOS ANGELES COUNTY. *Commissioners: Owen H. Lewis, Chairman; Alfred A. Paonessa, Vice Chairman; Mrs. L. S. Baca, Arthur J. Baum and Louis Kanaster. Director: Orville K. Christenson.*

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

## ADJUSTMENTS

Major adjustments in this issue reflect a special field count in and near the city of Carson, large annexations to the cities of Hawthorne and Compton and the removal of a trailer park in the Alondra Park area. Involved were the following dwelling unit changes within the unincorporated area: S.A. 10.211, +116; S.A. 10.212, —217; S.A. 10.213, —90; S.A. 8.332, —524; S.A. 16.633, —1,343 and S.A. 8,332, —524; and within cities: S.A. 10.31 (Carson, pt.), +283; S.A. 10.32 (Carson, pt.), +666; S.A. 8.4 (Carson, pt.), —58; S.A. 16.3 (Hawthorne, +1,062 and S.A. 8.1 (Compton), +524.

Only partial adjustment of the population totals in the Carson area were included in this issue. They will be completed and shown in the next quarter.

*Continued from front page*

1958. However, the proportionate share of multiple units in the net increase declined in 1968 to 66% as compared with 71% during the previous year. Correspondingly, there was an increase in the proportionate share of single units so that by the end of 1968 they represented 34% of the total net unit gain.

Duplex units experienced a slight net loss for the second consecutive year. This continues the trend which was noted in the second quarter of 1965 when this type of residential structure first began to show signs of losing favor.

The fourth quarter net increase of 4,921 units was 1,790 units or 57% higher than that for the similar quarter of 1967. Although this total is 83 units less than that of the immediately previous quarter, this apparent decline may merely reflect the Commission's tabulating procedures rather than an actual downturn.

The individual quarterly net dwelling unit increases for 1968 were as follows: first quarter, 3,794 units; second quarter, 4,719 units; third quarter, 5,004 and fourth quarter 4,921.

## RESIDENTIAL DEMOLITIONS INCREASE

Residential demolitions during 1968 totaled 9,298 dwelling units. This total represented the removal of 1,336 more units from the housing inventory than were taken out during the previous year and the greatest number of units taken down since 1964, a year in which 10,939 units were destroyed.

Dwelling unit demolition for the previous years of this decade have been as follows: 1967, 7,962; 1966, 8,121; 1965, 9,082; 1964, 10,939; 1963, 11,730; 1962, 9,026; 1961, 6,574; and 1960, 5,143.

A summary report on residential demolitions in Los Angeles County by jurisdiction for the years 1960 through 1968 is available upon request, without charge.

## REVISED MAJOR STATISTICAL AREA TOTALS

The Commission's Land Use Section recently completed recalculation of the gross area of each of the thirty-five Major Statistical Areas. Equipment not previously available to the staff was used to more precisely measure the areas. Revised totals stated both in acres and square miles have been provided for more flexibility of use.

# QUARTERLY BULLETIN
## POPULATION AND DWELLING UNITS

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

## POPULATION INCREASES 1,125,500 IN NINE YEARS

### April 1, 1969 Estimate .....7,168,200

The Commission estimates that the population of Los Angeles County has increased 1,125,500 or 18.6% in the nine years which have elapsed since the decennial census of 1960. This is an increase of a size equivalent to the combined population of the cities of San Francisco and Oakland and only 250,000 fewer than the total number of those now living in Orange County.

Although growth during the latter half of the decade has slowed, the increase during the "sixties" has averaged 125,055 persons a year. This is substantially less than the annual increase of 188,815 experienced during the "fifties". In terms of average daily increase, County growth has declined to 343 persons per day as compared with 517 persons per day in the preceding decade.

During the first quarter, the population of the County increased an estimated 13,355. This gain included the addition of 9,218 to those residing within the County's seventy-seven cities and 4,137 to those within the unincorporated area.

These increases raised the total persons within cities on April first to 6,122,319, a gain of 1,175,869 in the nine years since the decennial census, while those in the unincorporated area on this date totaled 1,045,881, a net decline of 50,369 in the same period.

Lakewood displaced Inglewood as the County's tenth largest city as the result of an adjustment made to recognize the results of a recently completed special census. The ranking of the other cities in the top ten remained unchanged. The population and rank of these ten cities on April first were as follows:

1. Los Angeles, 2,862,381; 2. Long Beach, 384,549; 3. Glendale, 137,917; 4. Torrance, 135,991; 5. Pasadena, 125,853; 6. Downey, 97,955; 7. Burbank, 97,262; 8. Norwalk, 96,537; 9. Santa Monica, 92,274; and 10. Lakewood, 87,864.

INSTITUTE OF GOVERNMENTAL

*These figures are compiled from a monthly survey of residential new construction, move-ins, removals, demolitions and alterations reported by each of the permit issuing agencies in Los Angeles County. Unit changes are entered in the estimated housing inventory after either actual or assumed completion.

**These totals include additional adjustments not reported in the regular building permit review.

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

## ADJUSTMENTS

Several major population adjustments in this issue reflect special field counts taken under the supervision of the California Department of Finance. These adjustments included the following population changes: S.A. 1.2 (Culver City) —2,227, S.A. 8.1 (Compton) —2,545, S.A. 10.32 (Carson pt.) +2,500, S.A. 16.2 (Inglewood) —2,780, S.A. 23.1 (Palos Verdes Estates) —468, S.A. 25.3 (La Verne) +1,837 and S.A. 31.3 (Manhattan Beach) —1,831.

The dwelling unit counts for these cities will be adjusted in the next issue.

THE REGIONAL PLANNING COMMISSION

## TWENTY-SEVEN SPECIAL CENSUSES SINCE 1960 CENSUS

Up to the close of April, twenty-seven special censuses had been taken in Los Angeles County since the last decennial census. Seven of these "specials" were conducted by the Bureau of the Census within the years 1962 through 1966. The remaining twenty were carried out under the supervision of the California Department of Finance beginning in 1965.

Only two cities, Manhattan Beach and Hawaiian Gardens have had more than one of these special field counts. The former was enumerated first in 1962 and later in 1968, while the latter was counted in 1964 and again in 1965.

All but one of the cities enumerated during this decade have been less than 100,000 population in size. This exception was Torrance which in 1967 had a population of 131,744. This experience contrasts sharply with that of the previous decade when 105 "specials" were conducted including two field counts of the city of Los Angeles.

SPECIAL CENSUSES
TAKEN IN
LOS ANGELES COUNTY
1960 - 1969*

| Year | Cities | Population Surveyed | Year | Cities | Population Surveyed |

| 1964 | 2 | 63,695 | 1969* | 5 | 224,136 |

* January through April

## 1970 ADDRESS CODING GUIDE NEARING COMPLETION

The block face address coding guide which the Commission has been preparing for use by the United States Bureau of the Census in coding the responses to the 1970 Census is nearing completion. The coding of the U. S. Post Office metropolitan delivery area has been completed. A total of 288 pounds of paper which included 65 annotated maps and coding sheets containing 300,000 block face listings has been shipped to Jeffersonville, Indiana, for Bureau processing.

Begun in late September 1968, the project has involved the listing of the potential low and high house numbers of almost every block face in metropolitan Los Angeles County. Those that were not listed are located for the most part in the Calabasas, Malibu and North County Major Statistical Areas. The house numbers in these latter areas are being coded only to the 1970 census tract boundaries. Early next year these two listings will be merged and together serve as the basis for the creation of an address index to the 1,576 census tracts which will be used to report the 1970 Census in Los Angeles County.

Although at the height of operations the total staff involved 58 employees, the average daily work force during the past six months only totaled 36.

Extensive research was required into the labyrinth of the more than 40 existing house numbering systems now in use in the County. This involved calling upon over 40 jurisdictions, the gathering of reference maps and in many instances field verification of actual house numbers. A more detailed recounting of these problems will be carried in a later issue.

The Commission gratefully acknowledges the assistance the project received from the County Registrar-Recorder, County Engineer, City of Los Angeles, many of the other cities and U. S. Bureau of the Census.

## MULTIPLE UNITS ALMOST ONE-THIRD OF ALL HOUSING

Net dwelling unit additions to the housing inventory during the first quarter totaled 4,520 units. This was 726 units more than were added in the same quarter of 1968, but 401 units less than in the immediately preceding quarter. The trend to multiple construction continued with more than sixty percent of the quarter net unit increase constituting this structural type.

This multiple construction trend which is now at the threshhold of a second decade is slowly eroding the predominance of single family units in Los Angeles County. This change clearly shows in a comparison of the dwelling unit type distributions for April 1960 and 1969. In 1960, the types were distributed as follows: single 66.4%, duplex 9.3% and multiple 24.3%. Today the distribution has shifted to: single 59.5%, duplex 8.2% and multiple 32.3%.

# QUARTERLY BULLETIN

## POPULATION AND DWELLING UNITS

ANGELES, CALIFORNIA

## LOS ANGELES COUNTY POPULATION

**July 1, 1969 ..... 7,185,229**

Los Angeles County population at mid-year totaled 7,185,229. This new total represents a gain of slightly more than 17,000 during the second quarter and an increase of 30,384 since the first of the year.

Second quarter growth within Los Angeles City accounted for 5,304 of the total population increase of 13,600 tabulated for all of the County's 77 cities. The unincorporated area during this same period registered a net gain of 3,429 to total 1,049,310.

## MODEST RECOVERY IN HOUSING CONSTRUCTION CONTINUES

Net additions to the housing inventory during the second quarter totaled 6,841 dwelling units. This was 2,321 more units than were added in the first quarter of 1969 and continues the modest recovery in housing construction which became evident in mid-1967.

Multiple units accounted for 69 per cent or 7,882 of the 11,361 total units added since the first of the year. However, single units have continued their strong showing with a net addition of 3,593 units during this same period.

A survey of the location of housing construction during the past six months revealed that approximately forty-two percent of the total net increase in the housing inventory occurred within three Major Statistical Areas. Contrary to earlier trends, these were: MSA 30.0 Santa Monica-Venice Area, MSA 22.0 Norwalk Area and MSA 23.0 Palos Verdes Area.

The addition of 2,004 units in the Santa Monica-Venice Area was entirely the result of multiple unit construction largely in the city of Santa Monica. The gain of 1,620 units in the Norwalk Area principally arose from a net increase of 1,290 single units centered

### LOS ANGELES COUNTY DWELLING TYPE UNITS**

| | | | | |
|---|---|---|---|---|
| July 1, 1969 | 1,525,325 | 210,764 | 829,432 | 2,565,521 |
| Apr. 1, 1960 | 1,401,581 | 195,010 | 513,017 | 2,109,608 |
| Increase Since 1960 | 123,744 | 15,754 | 316,415 | 455,913 |
| Percent of Total Increase | 27.1 | 3.5 | 69.4 | 100.0 |

*These figures are compiled from a monthly survey of residential new construction, move-ins, removals, demolitions and alterations reported by each of the permit issuing agencies in Los Angeles County. Unit changes are entered in the estimated housing inventory after either actual or assumed completion.

**These totals include additional adjustments not reported in the regular building permit review.

# POPULATION AND DWELLING UNITS

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

## ADJUSTMENTS

Changes were made in the dwelling unit totals of the following cities so as to reflect the results of recently completed field counts conducted under the supervision of the California Department of Finance: S.A. 7.2 (Covina City) +311, S.A. 8.1 (Compton City) —1,636, S.A. 16.2 (Inglewood City) —925, S.A. 23.1 (Palos Verdes Estates) +29, S.A. 25.3 (La Verne City) +388 and S.A. 31.4 (Manhattan Beach City) —69.

A reduction of 440 units in S.A. 32.1 (Bell City) was made to bring Commission estimates into conformity with a recent field count by city officials. Fifty-four units were added to S.A. 7.2 (Covina City) through annexations.

Special census population changes in this issue include the following: S.A. 25.1 (Pomona City) +1,944, S.A. 23.6 (Lomita City) —1,303 and S.A. 4.1 (Burbank) —1,833. The change in the Burbank total was made to compensate for a 1966 census not recognized before.

MODEST RECOVERY *(continued)*

in the City of Cerritos. The net increment of 1,104 dwelling units in the Palos Verdes Area reflected a gain of 868 multiple units, 242 single units and a loss of 6 duplex units. Most of this multiple construction occurred in Torrance while the majority of these single family units were constructed on the Palos Verdes Peninsula.

## THE RIGHT ADDRESS

Anyone who has tried to find an unfamiliar street address in the greater Los Angeles area knows something of the labyrinth the Commission's staff encountered in preparing the recently completed 1970 address coding guide. This project which reviewed the beginning and ending house numbers of almost every block face south of the San Gabriel Mountains found that there are forty-one different street address systems in Los Angeles County. Although thirty-seven of the seventy-seven cities in Los Angeles County use exclusively the county-wide system based upon the Los Angeles intersection of First and Main Streets, twenty-seven of the remaining forty municipalities employ a localized system; twelve recognize two or more address schemes and one, Rolling Hills, has an address system without an official point of origin.

Paradoxically Los Angeles City in addition to the county-wide system uses four other address plans. These community oriented systems generally continue address patterns existing at the time the locality was absorbed into the city. These systems and their points of origin are: Highland Park (York Boulevard); San Pedro (First Street and Harbor Boulevard); Venice (Ocean Front and the southern boundary of Santa Monica City) and Wilmington (Avalon Boulevard and A Street).

The eleven other cities which employ more than one addressing scheme include Beverly Hills, Bradbury, Compton, Glendale, Inglewood, Lakewood, La Verne, Redondo Beach, Rolling Hills Estates, San Marino and Torrance. These jurisdictions often combine the county-wide numbering scheme with one or more plans oriented to a local point of origin.

County government itself has not been able to achieve a uniform address system in the area it serves. Thirteen unincorporated places continue to use an addressing plan which is either peculiar to that area or a system carried over from an adjoining city. These communities and the systems they use are: Alamitos (Long Beach); Altadena (Pasadena); the Long Beach islands (Long Beach); Charter Oak (Glendora); Citrus (Glendora); Foothill (resembles Claremont scheme); La Canada and La Crescenta (Glendale scheme for north-south streets and the county-wide system for east-west streets); La Habra Heights (independent scheme); East Pasadena (Pasadena); Northeast El Monte (Monrovia-Duarte and Arcadia); San Jose (Pomona and San Dimas); and Spadra (Pomona).

One of the major problems complicating the application of a County-wide address scheme has been the difficulty of providing in outlying sections a clearly defined line upon which to base the north-south or east-west numbers.

Terrain, pre-existing street patterns and other factors have made necessary certain accommodations in prolonging the north-south dividing line, First Street, so that it now includes two city boundaries, seventeen different streets, the Pomona Freeway and at one point the San Gabriel River.

On the other hand the east-west divider, Main Street, which is continuous from downtown Los Angeles to Wilmington provides an easily located point of origin for house numbers for much of the County south of the San Gabriel Mountains. Division Street serves this same function equally well in the Antelope Valley section of northern Los Angeles County.

As if these difficulties were not enough the project staff had to sort through a great array of duplicated street names. They found, to name but a few, that within Los Angeles County there are 20 First Streets, 7 First Avenues, 12 Main Streets, 13 Broadways, 15 California Avenues, 10 Orange Avenues, 4 Los Angeles Streets and 4 Spring Streets.

All things considered, perhaps each of us owes a greater debt of gratitude to the beleaguered United States Post Office Department than we have realized before.

## WE'VE MOVED

Those users who have not had occasion to visit us within the last month will find that the Population Research Section has moved to another floor within the New Hall of Records. We now can be found in Room 1162. Our phone number remains unchanged, MA 8-9211, extension 63032.

# QUARTERLY BULLETIN
## POPULATION AND DWELLING UNITS

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

## LOS ANGELES COUNTY POPULATION

**October 1, 1969 ..... 7,199,041**

The Regional Planning Commission estimates that the population of Los Angeles County rose approximately 13,800 during the third quarter to reach an October first total of 7,199,041. This new total represents a gain of slightly more than 44,000 since January first and 1,156,000 or 19 per cent in the nine and one-half years since the 1960 census.

During the third quarter, the population of the County's seventy-seven cities increased 14,549, while the total number of those residing in the unincorporated area declined by 737 persons largely as the result of annexations.

The population of Los Angeles City on October first totaled 2,872,828, an increase of 5,143 during the past quarter. The relative population ranking of the other nine largest cities remained unchanged. Their rank and population were as follows: 2. Long Beach 385,266, 3. Glendale 138,377, 4. Torrance 138,123, 5. Pasadena 125,776, 6. Downey 98,648, 7. Norwalk 96,537, 8. Burbank 95,556, 9. Santa Monica 93,610, and 10. Lakewood 88,181.

## HOUSING RECOVERY FALTERS

Third quarter net additions to the housing inventory totaled 4,753 dwelling units. Although this represented a decline of 2,088 units or 30.5 per cent from the previous quarter, a review of the January to October net change shows a gain of 16,114 units as compared with 13,517 units for the same period a year ago.

Although multiple dwelling units continued to provide the major share of all net units added, the second quarter net total of 3,847 multiple units was well below the 5,039 net units registered in the preceding three months. However, it should be noted that the multiple additions in the third quarter of 1969 were twenty-five per cent greater than those in the same quarter of 1968.

The drop in the construction of single family dwelling units was responsible for the third quarter total net additions falling 251 units short of the total for the second quarter.

The combined dwelling unit increase of seven of the thirty-five Major Statistical Areas accounted for over sixty-two per cent of the quarter's gain. The Areas and their net unit gains were as follows: S.A. 30.0 Santa Monica Area 691, S.A. 13.0 Encino (Central Valley) Area 545, S.A. 31.0 South Bay Area 389, S.A. 23.0 Palos Verdes Area 340, S.A. 20.0 North County Area 329, S.A. 35.0 Wilshire Area 280 and S.A. 22.0 Norwalk Area 254.

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

## ADJUSTMENTS

Several large dwelling unit adjustments were completed in this issue. These involved the following: 1. the transfer of 117 units from S.A. 7.511 to S.A. 7.1 (Azusa City), 2. the shift of 979 units from S.A. 16.631 to S.A. 16.3 (Hawthorne City), 3. the addition of 161 units to S.A. 18.2 (Monrovia City) from S.A. 18.41 and 4. the removal of 444 units from S.A. 23.6 (Lomita City) to recognize a recent field count conducted under the supervision of the California Department of Finance.

Three of the above adjustments reflect large annexations and the fourth a correction to recognize a special census field count.

| | Dishwasher |
| | Home food freezer |
| | Television |
| | Radio |
| | Second home |

## 1970 CENSUS PUBLICATION SCHEDULE ANNOUNCED

The United States Bureau of the Census has released a tentative publication schedule for 1970 Census results. These long anticipated population and housing counts will be available both on summary computer tapes and in the conventional printed reports.

Preliminary population counts as compiled in the census field offices will be released during the period of June through September 1970. The Census Tract Report volume for Los Angeles County which will contain most of the information shown in the table opposite will not be available until late in 1971.

For the first time, block statistics will be available for almost all of the urbanized area of Los Angeles County. This will include such outlying areas as the central section of the Antelope Valley, Newhall, and the Malibu coastline. These block statistics have been tentatively set for release by the end of July 1971.

Those interested in more information about the 1970 Census summary computer tapes should write to: Central User's Service, Population Division, U.S. Bureau of the Census, Washington, D.C. 20233.

### 1970 CENSUS SUMMARY COMPUTER TAPES TENTATIVE RELEASE SCHEDULE LOS ANGELES COUNTY[1]

| Name of File | Reporting Area | Sample Size | Release Date |
|---|---|---|---|
| First Count | Blockgroup or Enumeration District | 100% | Dec. 1970 |
| Second Count | Census Tract and Census County Division | 100% | Apr. 1971 |
| Third Count | Block[2] | 100 % | July 1971 |
| Fourth Count | Census Tract and Census County Division | 15% and 5% | Oct. 1971 |
| Fifth Count | Zipcode | 15% and 5% | July 1971 |
| Sixth Count | (In the design state)[3] | | Nov. 1971 |

1. Source: U.S. Bureau of the Census, "Tentative Publication and Computer Tape Program," November 1969.
2. Most of the Los Angeles basin and portions of the Antelope Valley.
3. Detailed tabulations and cross classifications for states, SMSA's and larger cities and counties.

# ERRATA

For those who have received the Industrial Land Requirements in Los Angeles County, please note the following errata:

Page 14, Table V, should read:

| | Secondary Reserve |
|---|---|
| East San Gabriel Valley | 467 |
| San Fernando Valley | 526 |
| Southwest Area | 2,786 |
| West San Gabriel Valley | 579 |

Page 18, San Fernando Valley: Industrial Zoned Land Reserve should read 2,269 acres.

Page 29, Appendix B, Table 1, Manufacturing line, 1960 column, should read 760.4.

Requests for the report are still being filled from a limited supply. If a copy is desired, write or telephone:
